Single Spiral, Single Stem

One layer of filament twisted between two single stem wires.

Abrasive Single Spiral Power Brushes

Single spiral, double stem, galvanized wire filled with silicon carbide abrasive nylon for a high degree of stiffness and a fast-cutting rate. For wet or dry applications. Can be used manually or in power tools.

Single Spiral, Double Stem

One layer of filament twisted between double stem wires, for added strength.

IMPORTANT

Always operate a spiral brush in the same direction the stem is twisted. Rotating in the opposite direction may loosen the stem wire and cause the brush to fall apart.
